## 5 G Re-Visited

January 2020

Dear Port Renfrew Business Owner.  
You are receiving this email because of your relationship as a business owner in Port Renfrew. You may [un-subscribe](#) any time if you no longer wish to receive our emails.

This is a bi-monthly newsletter and will continue again in February. I have the deepest concern for the serious health and surveillance risks presented by the roll-out of 5G. I have added to the update more information on 5G as it appears to be somewhat connected with the health issues of the coronavirus. Over exposure to EMF has similar health effects as flu viruses. News & information links can be found at the end of this newsletter.

So I open up the news today and what do I see? Headline... Doctors & Scientists Call On President Trump For Moratorium On 5G Wireless Technology January 31, 2020.  
A broad coalition of scientists, doctors are calling on President Trump to suspend the rollout of 5G until proper testing has been completed over health concerns. by Niamh Harris.

[The letter references](#) the published scientific studies demonstrating harm to human health, bees trees and the environment from current wireless technology and posits that 5G will both increase exposure and add in new technology never safety tested for long-term exposure.

[Press Release](#)

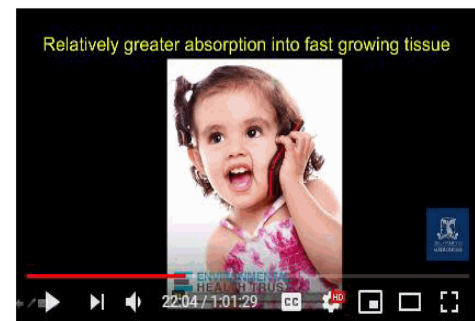

The understanding of a few simple physical concepts is important to the discussion of any interaction between external physical agents and biological systems. This takes time. This is part of the difficulty educating others to what 5G really means in the long run. Dis-information can be easily found. Science Facts take time.

I have compiled together some 5G information, formatted to catch you up on this health hazard technology. This all began with the cell phone and micro waves. Micro waves are made out of metal... read on

**If you only look at one link in this Newsletter this video would be the one!**

*by Dr. Devra Davis*

*1,089,330 views • Dec 2, 2015 This is now 5yrs old! Our cell phone is a two way microwave radio.*

Over 230 scientists from more than 40 countries have expressed “serious concerns” regarding the ubiquitous and increasing exposure to EMF generated by wireless devices before we had the addition of a 5G roll-out. Now it is called the 5G Appeal.

**As of October 15, 2019, 252 EMF scientists from 43 nations have signed the Appeal.**

The Trusted World Leader in EMF Protection & Safety provide Scientific Studies on the Health Effects of EMFs.

Noted are the discrepancies from most of this research as funded by the cell phone industry, and many independent scientists, such as Dr. Martin Pall, have found this research to be biased or designed to fail.

“Of studies that found an effect on cancer, 11% were industry funded, 47% were independently funded. Cellular and molecular effects: 19% industry, 69% independent. Electrophysiology effects: 33% industry, 77% independent. Physiological and behavioral effects: 57% industry, 83% independent.”

[Biological Effects of EMFs - publication in .pdf](#)

**5G Cell Towers are More Dangerous for Two Main Reasons:**

First, 5G emits “ultra high frequencies”. The higher the frequency, the shorter the length of each wave. This means more waves hit our bodies in the same amount of time. Previous cellular generations emitted from 1 to 6 GHz frequencies. 5G cell towers may emit frequencies as high as 300 GHz.

Second, 5G technology requires “ultra high intensity”. Since the shorter length millimeter waves (MMV) used in 5G do not travel as far (and get obstructed easier), with our current number of cell towers the cell signal will not be reliable. To compensate 5G cell towers will have to emit the lower 3G & 4G waves as well, and many more “mini cell towers” will have to be installed. It is estimated that they will need a mini cell tower every 2 to 8 houses. All of this combined will greatly increase our RF Radiation exposure.

With RF Radiation, how close the source is to our physical bodies is more important than the power level (or wattage) of the radiation.

(Warning: do not use “hard wiring” methods that send the internet signal over a building’s regular electrical wiring. This causes the wiring in your home to emit carcinogenic dirty electricity. You trade one form of harmful EMF radiation for another).

## Their nick name is "Junkyard on a Pole"

The estimates are "10 to 20 billion connections" (to refrigerators, washing machines, surveillance cameras, self-driving cars and buses, etc).

Direct cable into your home or office. Turn off the wi-fi! This is the best way to lower increased risk. A direct cable into your router turns off the wi-fi signal. Your phone is already connected so keep it close, and avoid it located on your person if possible. Use your speaker phone when you can.

I have compiled from the EMF Safety Network and other locations links to what we can do to stop this global attack on our physical and mental health. On the following page you will find some ideas and suggestions towards this end. I hope you find this helpful and useful.

Educate and engage the community about EMF/wireless health risks.

Here is a brochure about EMFs

and a Stop 5G fact sheet in .pdf

and a Stop 5G bee flyer

*you can use to start a conversation. Mobilizing other people to get involved to take action is important. Even a few people can make a big difference. It is important to educate decision makers on the science of harm, because this will motivate them to find ways to deny the application.*

*People can also argue aesthetics, location, loss of scenic views, property devaluation, and no significant coverage gap.*

*Speak at public comments at city and county meetings and meet in person with city and county decision makers. Speak to those issues with the strongest science, boil it down to basic terms and concepts, and document the claims you make. For example: Peer-reviewed published science shows harmful effects of cell tower radiation include: fatigue, headaches, sleep problems, anxiety, ringing in the ears, heart problems, learning and memory disorders, increased cancer risk, and more. Children, the ill and the elderly are more vulnerable.*

The International EMF Scientist Appeal serves as a credible and influential voice from EMF (electromagnetic field) scientists who are urgently calling upon the United Nations and its sub-organizations, the WHO and UNEP, and all U.N. Member States, for greater health protection on EMF exposure.

See also:

International Society of Doctors for Environment 5G Appeal. There are 200,247 signatories from 202 nations and territories as of February 5th, 2020.

Share important news:

Democracy Now - reported on an investigation by The Nation "How Big Wireless Made Us Think That Cell Phones Are Safe."

and

"How Big Wireless War-Gamed the Science on Risks, While Making Customers Addicted to Their Phones"

The telecom industry for the past 25 years war gamed the science by funding "friendly scientists" - tactic used not only by the tobacco and fossil fuel industries, but also by big pharma ("Big Pharma, Bad Science" The Nation Mag 2002) and the chemical industries, such as DuPont, Dow Chemical ... among others

For current news follow EMF Safety Network on Facebook.

When there is an application pending: Send a letter by mail and email to the decision makers and go to the public meetings to speak out and oppose. Gather others to go to the meeting to also speak out. Make signs for the meeting! Please note: decision makers are often volunteers and they need to be educated about complex EMF science and laws. You may want to ask the city to hire an independent RF specialist to prove there is a coverage gap.

Get involved! Connect, and write your MP.

Make posters of Shelley Masters 5G Artwork and ask shop owners to put them up. To obtain a higher resolution file for reproduction contact emfsafe at sonic.net.

Armed with scientific knowledge, and understanding of 5G technology will allow us all to change our world, for the better of all, and the future of generations to come. I support the halting of 5G and all satellite and harmful radio electronic emissions.

You Won't Believe How EMFs Affect Your Body!
